Ms. Blanchard explains Fund 20 pays for retiree benefits that is in our collective bargaining contracts. Mr. Blanchard states every four to five years an actuarial report is made to show debts. We would like to see better interest but don’t want to play the stock market. Trustee Morey asks about Weaverville Elementary and Trinity High School Program Improvement. Mr. Barnett states it is in limbo due to all the changes they’ve had. Mr. Barnett further explains; Program Improvement each year you are acquired to do certain things and each year changes in assessments have put them on hold until the new accountability measures come in. When in reference it is regarding student performance which then impacts fiscal.

Phase two to take care of the accessibilities to the front of the school and to build the life skills room. Bids to be looked at as they come in. Ryan suggested acting out as the general contractor for the life skills building and sub out each of the components to get more local bids. Trustee Gervasi asks about the difference in our portable units with the HCD buildings no longer being used as of September 30, 2015. Mr. Miller explains it is classifications of contractors. Trustee Gervasi further asks if money will be saved with having Mr. Miller as the general contractor. Mr. Miller explains an outside general will put on 10% on the top of the sub-contracts and we would save on this along with doing some of the flat work and in house work. Trustee Gervasi toured the AG barn and questioned Ryan about the electrical. Mr. Miller would like to have an electrician come in for installation of power to the building. Mr. Miller can then oversee the project and possibilities of students to come in and learn. Trustee Gervasi questions if the new life skills building will cover a HVAC well. Mr. Miller confirms and explains he has looked at all directions with well designers and architects. It is the best
possible location for site and if needed another well can be drilled or divert if the well fails. The alternative would be to remove two buildings and that is not cost effective. The wells have a 50 year life and a lot can be repaired, the slab will cover 3 wells out of 15 well system; if failure happens you can tap into one of the systems. More information when bids come in. Gervasi asks if the concrete will be done before school. Mr. Miller explains the phasing-in process. Mr. Miller would like to start before April to start life skills building.
